

Tekleen Automatic Filters unveils new two-stage CSF-ABW automatic water filter

LOS ANGELES, California, May 14, 2019 —TEKLEEN AUTOMATIC FILTERS, INC. announced today that it will provide a demo for their newly released CSF-ABW automatic filter at the 2019 Chem Show, being held at the Javits Center, New York City, from October 22 to October 24, 2019.

The CSF-ABW water filter is a two-stage self-cleaning water filter manufactured in one vessel, used for cleaning debris in various water sources.

TEKLEEN AUTOMATIC FILTERS, INC. manufactures self-cleaning automatic industrial water filters. The smart water filters reduce maintenance costs, save water, and help increase productivity.

“Tekleen Automatic Filters is excited to exhibit a variety of the latest automated cleaning industrial filters for the attendees of the 2019 Chem Show,” says Dan Flanick, Tekleen sales manager. “This year we are emphasizing the CSF-ABW automatic water filter, which saves space and time by combining two filters into one. Attendees can see a demo of the CSF-ABW self-cleaning filter at the Show. We welcome anyone interested in finding out more details about our filters to visit us at **Booth 605** during the event.”
