

Get Your Questions Answered by Chemical Safety, Dust Explosion and Fire Protection Regulatory Compliance Experts

Framingham, MA July 31, 2019

The chemical safety, dust safety and fire protection engineering specialists from Engineering Planning and Management, Inc. (EPM) will be present to discuss questions or concerns related to the safety of your process and facility at the 2019 Chem Show being held at the Javits Center, New York City, Oct. 22 to Oct. 24, 2019.

The EPM team includes experts in various regulatory compliance subjects ranging from Process Safety Management (PSM), general code consulting and fire protection system design.

EPM also offers a suite of user-friendly software products that streamline various programs such as safe work permits, the management of change process, mechanical integrity and emergency response. **The solutions offer a return on your investment** by improving the efficiency of your business processes, reducing risk and increasing reliability.

“Attendees at Chem Show are the people responsible for managing the manufacturing processes and the equipment maintenance, therefore they play a key role in safety and business continuity. EPM provides tailored safety and reliability solutions that fit seamlessly into any type of organization.” - Janet Persechino, Technical Manager - Chemical Process Safety at EPM.

Attendees can schedule a free consultation or software demonstration by reaching out to EPM via the Chem Show application, the contact information below or by visiting Booth #445 during the event.

About EPM

EPM, Inc. is an engineering and consulting firm that specializes in Chemical Process Safety and Fire Protection. Services include development and implementation of all elements of Process Safety Management. The Fire Protection Engineering Division capabilities include code consulting and fire/explosion modeling along with fire protection design services for suppression, detection and alarm systems. EPM also has a suite of software products that supplement the consulting services. These products help businesses manage various programs such as safe work permits, the management of change process, mechanical integrity and emergency response. EPM’s services and software solutions offer a return on your investment by streamlining your business processes, reducing risk and increasing reliability.
